## Work experience, 5+ years

### Android Developer, MarkaVIP

October 2014 - Current

As an Android Developer, I am responsible of end-to-end **Android** application development of Middle East e-commerce giant, MarkaVIP.

### Senior Software Developer, Mobilike

August 2013 - October 2014

As a Senior Developer at Mobilike, I was responsible for the **Android** and **iOS** mobile development. Some of my notable works include **Seamless Display**, native & interstitial advertisement SDK, that takes advertising beyond imagination with taking advantage of every aspect mobile has to offer, **Seamless Player** project, Vast 3.0 compatible video advertising SDK, that enabled super dynamic advertisement creativity, and some mobile application develop, fix, polish, enhance.

### Senior Software Developer, Nomad Commerce

July 2013 - January 2014

As a Senior Software Developer at Nomad Commerce, I was responsible for the Android and iOS mobile (UI, UX and code) development and **consultancy** for 3rd party companies.

### Senior Software Developer, Dmobil

June 2012 - July 2013

As a Senior Software Developer at Dmobil, I was responsible for the **server-side** and **client-side** (mobile and web) development. Some of my notable works include **Social Call** project, that removes "0 (123) 456 78 90" clutter and enabled us to call the real identities like "John Appleseed" from GSM, **advertising system**, that enabled usage of multi ad-network usage as well as custom micro ad-sites to promote company's products, **several multiplayer game server-side implementations**. I also did the whole mobile ecosystem (best practices for UI, UX, code) **consultancy** on **Android** and **iOS** to the graphic designers, developers including interns during my time there.

### R&D, Software developer, Done Labs

March 2012 - April 2012

### R&D, Intern, Argela

October 2010 - December 2010

### Computer/IT Services, Intern, Datamarket

June 2009 - July 2009

## Educational background
